Brenda Lucki

Brian Brennan

Trish Ferguson OPS

Michel RCMP

Allison *** RCMP

Lucki- we all need to succeed- need to get credibility and maximize the regs. We are here to help in any way we can.

Bell- spoke about the great success around our integration team. We know you are here to support us. Seeing the best level of cooperation we have seen yet. Good plan and command structure developed. Appreciate all your efforts- putting the challenges behind us. We are engrained with Carson and team at the NOC- believe we have turned a corner from coordination perspective.

Anything specific you need from us?

Lucki- going back to original plan- in original plan suggestion that OPS command would take care of the city and separate command look after the protest. What we envisioned was taking the comms out of the Chiefs hands and putting it down to the operational level- this is our mission and this is what we did. Strong operational messaging out of political realm. Want people assisting Trish – but lead to come out of OPS.

Commr Carrique- confirm we will use RCMP terminology- gold / silver/ bronze. Will you sit in the gold with the 2 DCs –Trish in the silver with Carson- CICs are the bronze. Want to ensure these are roles we see moving forward.

Alison RCMP- that is what we're looking at. Needs to be grounded – real- committed comms people driving our comms.

Lucki- Allison will be integrating into that- the mayor has also reached in. Mike reached in to his Chief of Staff to follow up- will brief him daily to bring comfort- not resource numbers- you will get what you need will be the message. Brian looking after the contract side.

Mike- meeting with Chief of staff- mayor- nothing to do with numbers- wanted to provide explanation to come to agreement with truckers and why they went onto wellington St. Reaching out to our ICC group to see if that is good idea. 40 trucks left yesterday. Some went to Embrum- just outside of the city. They're working though that. Steve, I will contact you.

Lucki- designated zones- if you want to double down and designate something and we cannot enforce it- asked that they don't designate anything- we will be looking at designating ports of entry- kms around

ports of entry- when things start happening in Ottawa, want to ensure infrastructure is stable. Need to look at designations going forward.

Commr- to Steve- what is expectation of your board- how do you think that was left?

Bell- realistic it will be to lay out operational plan in a public and open forum. That is their hope. They also know that they cannot direct us. But that we would brief at an appropriate time. Hope to do it prior to the weekend (shrink the footprint)- as long as there is some progress, will be able to get through the weekend to properly execute the plan. Will need some real enforcement of the legislation.

Lucki- my minister very persistent. Plan with engagement/ reduce the footprint and a lockdown of the city for the weekend. Cannot have more people coming in.

Bell- just briefed on that to the board- keep as many out over the weekend- continue to shrink it.

Lucki- have much of that in writing already- will share with OPS to assist with comms- speaking points.

Commissioner- Ottawa has Morden report [REDACTED]
[REDACTED]

Will be helpful to have 24/h operational cycle. Need something showing what the next 12 hours will look like. Then a 24 hour. What are we accomplishing operationally by tomorrow? If I had that and Commr Lucki and Bell, should give us the space we need while the operations drive this forward.

? Agree- get unified structure established. Will provide those.

Allison- comms strategy- what can we do to emphasize the unified command team following OPS lead.

Harkins- will be heading down tonight. Will connect with you tomorrow at the RCMP office.

Will leave it to Trish and Carson to find time for us.

Carson – lens has been public safety/ officer safety throughout. Planning team is heavily tasked. Form outreach to tactical / POU group- team coordinated- ask going out- plan in motion. From frontline officer perspective- as we start leveraging, that is ongoing currently. 12/ 24/ 36 objectives – will be reporting on.

Lucki- would it be worth some comms to get it started- thanking Steve/ Trish and OPP commr noting we are committed to working together?

Bell- would like to follow we have- go down operational table- run through first

Commr- should that come from Steve- need to hit reset button- instill confidence- invite us officially to the table. Good step forward by you Steve

Bell- my board meeting was all about that.
